

# Moderate Powered BEHIND-THE-EAR AIDS

## for mild to moderate losses

- Has two microphones which allows for directional hearing
- Sounds in front of you will be emphasized - sounds to your side and rear minimized
- Very small and inconspicuous
- Has tone and AGC adjustable trimpots (Automatic Gain Control protects against too-loud sounds)
- Uses #13 battery - also features telephone setting
- Good choice for a high frequency loss

### MODEL L78-D ..... \$329<sup>50</sup>

Max. SSPL90 .....120dB  
 Av. Full-on Gain .....47dB  
 Freq. Range ....500-6000 Hz

*I am so pleased with my hearing aid, it's like hearing for the first time. I can hear my favorite music and it sounds WONDERFUL! You cannot imagine what you have done for me. You've changed my life. I will never be able to thank you enough!*

N.C., Ellington, CT
