Is Your Hearing Aid At Risk?

TROUBLE WITH WAX GETTING INTO YOUR AID? HERE'S THE ANSWER

Earwax getting inside the aid is by far the #1 cause for repairs of I-T-E hearing aids. Avoid costly repairs and downtime with your instruments. This proven remedy works similar to a "Band-aid" as it covers the receiver outlet hole with a special pass-through filter allowing the sound to pass clearly while keeping out damaging earwax or wetness. Each
